

Plastic PVC cords with extremely accurate dimensions

Roffelsen Plastics is a leading manufacturer of cables and PVC cords for the manufacture of screens used for canopies, insect screens and screens. The market, also known as the sun protection market, uses many products that are very durable, flexible and easy to process. They produce PVC cord in various hardnesses, diameters, wall thicknesses and colours. Special roll in PVC cords are extruded with a star profile especially for insect screens.

Roll-in PVC cord

The roll-in PVC cord is particularly suitable for insect screens. The roll-in PVC cord has ridges on the outside and is hollow. The PVC cord is rolled over the stretched mesh into an aluminium profile using a special roller. As a result, the mesh gets stretched into the frame. Roll-in PVC cords are available in a variety of interior and exterior diameters, in various elasticities, colours, and also with a different number of ridges (star shape).
