

Plastic products for the Sign industry (SOFT SIGNAGE)

Due to the increase of large format printers for both PVC banners and textile frames, the demand for solutions for fixing printed cloths to aluminium frames has dramatically increased. Printed fabric cloth in aluminium frames is used for the construction of exhibition stands, for example, in stores as an eye-catcher, or as a Point-Of-Sales communication aid. Textile frames are also being increasingly used in museums, offices and interiors.

Rounded PVC cord for banners

Rounded PVC cord is designed specially for banners. The round PVC cord is pushed into the hem of the banner. The PVC cord makes it easy to attach the banner into a coupling profile. Round PVC cord is available in diameters from 2 to 20 mm and in a variety of colours. This round PVC cord is often used as keder inlay.

- Material:** PVC
- Dimensions:** Diameters from 2 to 20 mm
- Surface:** Smooth
- Colour:** Transparent, black, white. Other colours are available on request.
- Packaging:** On roll or spool
