

Plastic products for the Sign industry (SOFT SIGNAGE)

Due to the increase of large format printers for both PVC banners and textile frames, the demand for solutions for fixing printed cloths to aluminium frames has dramatically increased. Printed fabric cloth in aluminium frames is used for the construction of exhibition stands, for example, in stores as an eye-catcher, or as a Point-Of-Sales communication aid. Textile frames are also being increasingly used in museums, offices and interiors.

Flag PVC cord

The flag PVC cord is a PVC cord profile. The plastic flag can be welded or stitched directly to the PVC cloth. Because of the PVC cord's round head, the fabric can simply be pushed into a coupling profile. The flag PVC cord is available in various sizes and colours for both interior and exterior use.

- Material:** PVC Shore-A 75
- Dimensions:** Many sizes available
- Surface:** Smooth
- Colour:** Many colours available
- Packaging:** Pack onto rolls of 100, 200 or 250 metres.
