

## Clothes line for large-scale use, rotary dryers and the consumer market

Roffelsen Plastics started by producing clothes line cable in 1976. As a result of building up years of extrusion experience and knowledge, the clothes line cable is still the main product in the range.

### Product features and materials

During the extrusion process, a package of core material is sheathed with plastic. The choice of the core material largely determines the product properties: tensile strength, elongation and suppleness.

**Material:** PVC Shore-A 80, PP, LDPE

**Dimensions:** Mostly between 2 and 6 mm

**Surface:** Smooth or ribbed

**Colour:** Many colours available

**Packaging:** From 10 to 6000 metres. Packed onto rolls, reels, sleeves or as strings.
