

## Plastic cables to strengthen sail

Roffelsen Plastics is a leading manufacturer of various cables and PVC cords to strengthen sail and canvas. For the sail maker's market, they produce a wide range of specific plastic cables, PVC cords and profiles. A widely used product is the round PVC cord that is used for the manufacture of keder. The scope of application is very wide, for example: truck tarpaulins, awnings, tents, boat covers, stable curtains or banners.

### **PVC cord for keder**

Keder acts a textile reinforcement for tarpaulins, awnings, tents, stable curtains or banners. Roffelsen Plastics produces PVC cord for the keder inlay.

Each plastic material has its own hardness, strength and elasticity, which influences the processing of the PVC cord greatly. We would be happy to provide you with advice about the standard products in this product group. It is also possible to develop a specific material that is tailored to your work process.

- Material:** PVC Shore-A 75 – 80
- Dimensions:** Exterior diameter from 3 to 15 mm.
- Surface:** Smooth
- Colour:** Transparent or in any other desired colour
- Packaging:** Pack onto rolls of 100, 250 or 500 metres.
